

**Name:**  
Joshua Matthew

**Job title:**  
Product Manager

**What do I do:**  
I work with software engineers and scientists to build the right software products to meet the needs of our users and help facilitate the scientific research at Wellcome Sanger Institute.

### My career highlights

### What do I enjoy most about my job?

Each software product is a solution to one or many real problems. I enjoy the fact that I am a key player in solving real problems that make scientific research easier.

### What's next in my career?

I look forward to becoming a Product Leader to work on more complex software solutions while mentoring other Product Managers and enthusiasts.

## Skills I use in my job :

### Creativity

I always explore creative ways to inspire creativity during team activities, such as brainstorming ways to improve our software products

### Teamwork

I work with many people within my team at Sanger including those who belong to different teams

### Communication

Communicate effectively and clearly with users of our softwares, who are mostly scientists, and with the engineers that build them

### Problem solving

Identify problems being faced by our users, understand them, and propose possible solutions

## My top tips for students wanting a career in genomics:

- Be open-minded. Not everyone in genomics is a scientist, but everyone here contributes value to furthering scientific research.
- Your career path will not always be clearly defined, you can be anything!

## What hobbies do I have?

Talking on my podcast shows about data topics and product management. As well as going to the gym, and playing the piano.

Search 'Joshiverse' on YouTube and Spotify to find my videos and podcasts.
